

# 08-13 Cadillac CTS RGB Taillights

## Tools Needed

- 10mm Wrench
- Zip ties
- Flat head screw driver
- 12v source

## Installation Quick Tips

### Removing OEM Tail Lights

#### Driver Side

Remove the clips on the left side of trunk liner, bend it downwards and you'll see 10mm bolts. Remove the bolts and slide the taillight out towards you, you can use the flat head to put it inside the plug (top side) and push downward lightly and out to get the plug out.

#### Passenger Side

Repeat process of driver side, and remove the battery lid as well. You will see the 10mm bolts. Repeat the same trick for driver side to remove the plug.

## RGB Tail Light Installation

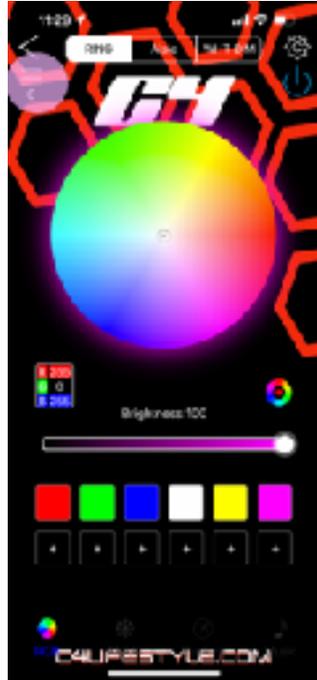

You will see on the bottom (picture attached second page) an OEM sticker covering a hole from factory. Remove the sticker and run the two RGB plugs thru that hole. Reconnect the plugs on the inside of the car. Repeat the same to the passenger side.

(Driver side) Wiring as been made long enough to bring to the passenger side where the battery is located. (Passenger side) wiring has been done long as well incase you need to wire it somewhere so you have leg room. Cut as needed.

You will need a 12v power source to connect the boxes too. You can tap in both lines together. (Red) power (black) ground. Once boxes have power. Download the app (small paper included) for iOS or Android to sync the boxes to the app.

Please make sure the boxes are towards the top of the taillights (from the inside of the car) so the app can connect to the boxes with no problem.

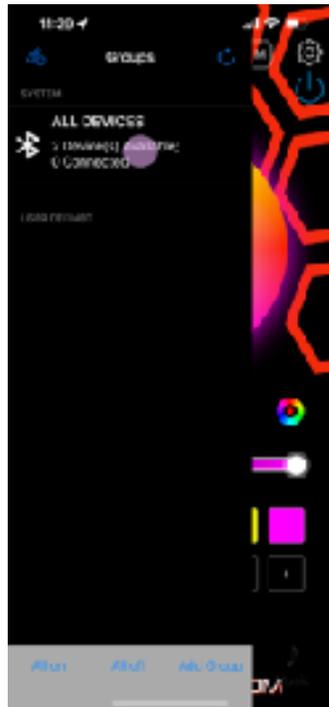

Pink circle.  
Tap the 3 lines

Pink circle  
Tap the refresh icon

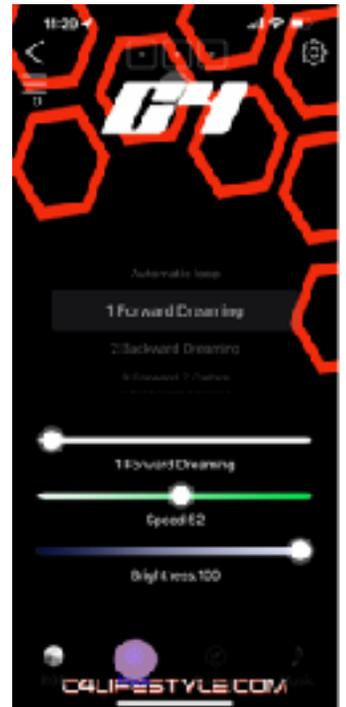

Pink circle  
Once you see 2 Devices  
found. Tap the  
highlighted circle to  
connect to the boxes

Pink Circle  
Tap on the second  
icon on the bottom  
menu.

Forward dreaming is  
color chasing. You  
can play with the  
speed and  
brightness. You can  
scroll thru the  
animations (over 20)

Dont forget to turn on the RGBs (top right under the gear icon, if at first they do not turn on) And second remember to turn them off once your done using the RGBs.

DO NOT USE RGBS WHILE CAR IS DRIVING. Offroad / Car Show use only.

Once the app is downloaded and you reload the connections to pick up the bluetooth boxes. You can stand 3 feet from the center of your trunk and refresh the app. Screenshots below of the app menu.
